Salman Sajid

Senior Frontend Engineer • AI Agents & Automation

Lahore • +92 3104686610 • salmansajid141@gmail.com

LinkedIn • **Portfolio** • **GitHub**

Frontend engineer with 5+ years shipping production React and Next.js products, now building custom AI agents with Mastra and automating business workflows with n8n. Comfortable across the stack with Node.js, NestJS, PostgreSQL, and Supabase. Known for turning loose requirements into polished, high-performance interfaces that real users depend on.

SKILLS

- HTML 5
- CSS
- JavaScript
- TypeScript
- React Js
- NextJs
- Redux
- Zustand
- Material Ui
- Tailwind
- shadcn/ui
- Node Js
- Nest Js
- Express
- PostgreSQL
- MongoDB
- Supabase
- git
- n8n
- Mastra
- Docker

WORK EXPERIENCE

DigitalTribe **09/2026 - Present**
Senior Frontend Developer **Lahore, Pakistan**

Working as a Senior Frontend Developer, leading the development of scalable, high-performance web applications using React.js, Next.js, and TypeScript. Responsible for architecting reusable component systems, guiding frontend best practices, and collaborating with design and backend teams to deliver polished user experiences.

Xeven Solutions **07/2025 - 07/2026**
MERN + Next.js & NestJS **Lahore, Pakistan**

Worked at Xeven Solutions as a Frontend/Fullstack Developer, focusing on building web applications using Next.js, NestJS, and PostgreSQL. Gained hands-on experience in developing scalable backend APIs, integrating frontend interfaces, and working with modern web technologies to deliver efficient and maintainable solutions.

Argon Tech Inc. **11/2022 - 07/2025**
React/Next JS Developer **Lahore, Pakistan**

- Built and maintained responsive, modular interfaces using Next.js, React.js, and TypeScript.
- Designed custom components and UI/UX with Tailwind CSS and Material UI, ensuring pixel-perfect, mobile-responsive layouts.
- Managed global and local state with Redux and Zustand, simplifying app architecture and improving performance.
- Integrated RESTful APIs and collaborated with backend teams on blockchain network integrations.
- Maintained high code quality through code reviews, reusable component libraries, and consistent refactoring.

XISLABS **06/2021 - 11/2022**
React JS Developer / Front End Developer **Lahore, Pakistan**

- Built dynamic web pages using HTML5, CSS3, and TypeScript.
- Improved application performance by implementing Redux for state management.
- Integrated RESTful APIs and enhanced frontend functionalities using React.js.

Workwox **02/2021 - 05/2021**
React Js Intern **Sahiwal, Pakistan**

- Assisted in developing frontend components and gained practical experience with React.js.

AI AGENTS & AUTOMATION

Company Assistant Agent
Live site • GitHub

Personal project — ask a company anything: “Which projects are at risk?” “Is anyone overloaded?”

Tech: Mastra, Next.js, TypeScript, Vercel AI SDK, SQLite, Groq (LLM + Whisper), Docker

- Built a **custom AI agent** with Mastra that turns plain-English questions into live answers from the company database
- Purpose-built tools for the questions managers ask most: project health, overdue work, team workload
- Guarded **text-to-SQL** tool for any other question, with no risk to the data
- **Conversation memory** so follow-up questions keep their context
- **Next.js** chat UI with streaming replies and a voice mode: speak to the agent, it speaks back
- Tracing of every tool call and model response in Mastra Studio for debugging

Workflow Automations with n8n
2026

Tech: n8n, Google Sheets, Email (Gmail/SMTP), LLM integration, Database

- Built a **lead capture** workflow that detects new leads, appends them to a Google Sheet, and handles email notifications and follow-ups
- Built an **AI support auto-responder** that checks incoming tickets and matches each question against a database of prebuilt answers
- Replies with the matched answer when the AI finds a match, and falls back to a generic response otherwise

PROJECTS

The Business Hub Pakistan
Live site

Meer Group

Tech: React.js, Vite, Supabase (auth + DB), Tailwind CSS, shadcn/ui, ApexCharts, n8n

- Built a live role-based SaaS portal (admin, investor, founder) serving **6,000+ active users**
- Implemented Supabase auth, real-time database with row-level security, and role-based routing
- Delivered proposal workflows, verification, support tickets, and bulk notifications with n8n automations
- Shipped admin analytics dashboards with ApexCharts, cutting manual reporting effort by **~60%**
- Optimized performance and UX with lazy loading, code splitting, and responsive layouts

Covis
Live site

AI-driven multi-tenant enterprise SaaS

Tech: Next.js, NestJS, PostgreSQL, Tailwind CSS, shadcn/ui, GitHub Actions

- Built frontend modules for an AI-powered platform with **AI agent dashboards** and automated proposal generation
- Developed client management portals for a multi-tenant architecture
- Delivered a Jira-style project management module with Kanban drag-and-drop, sprint planning, and backlog
- Set up GitHub Actions CI/CD pipelines for automated deployments on every merge

TAQWI
Live site

AI recruitment platform

Tech: React.js, Node.js, AI/LLM integration, Video APIs, Tailwind CSS

- Built an AI-based HR and recruitment platform end-to-end from CEO requirements
- Implemented multi-stage **chat assessment** of candidates powered by LLM integration
- Integrated face-to-face **AI avatar video evaluation** using video APIs

MyShahada
Live site

Islamic education and certification platform

Tech: Next.js, Tailwind CSS, Contentful CMS, Node.js

- Built the first online Shahada platform, connecting new Muslims with live scholars for verified revert certificates
- Developed Quran study, Hadith exploration, prayer times, mosque locator, and halal food finder features
- Delivered structured courses on Islamic fundamentals with content managed in Contentful CMS

EDUCATION

Computer Science
University Of Arid Agriculture, Murree Road — Sahiwal • 2016 - 2020

F.sc Pre Engineering
Punjab College — Sahiwal
